1. SAMPLING AND SAMPLE PROFILE

For the year 2017 the Broadcasting Authority made arrangements with the N.S.O. so that data is collected for one month within a specific quarter. During this year data will be collected during the months of February, July and October 2017.

For these three assessments, the telephone questionnaire was changed. The perpetual questions “Which 3 radio stations did you listen to most yesterday?” and “Which 3 TV stations did you follow most yesterday?” were maintained as these indicate radio listening and TV following patterns of the local population. Each respondent has the facility of naming three different broadcasting stations for three different time spans throughout the day.

Previously respondents were asked which their three most favourite television programmes were. The aim of this question was mainly to identify what was the most programme genre which was generally viewed even if it was not watched the day before the interview. In fact, the list of programmes that were named were classified according to their genre and the results showed the programme genres that local media consumers preferred.

For this period, respondents were directly asked what type of programmes they like to watch on local television stations. A list of eleven options was read out and respondents were asked whether they liked or not to watch each programme genre.

Another area which the Authority wanted to research is what type of service respondents have to watch television in view of the introduction of IPTV [television content through Internet], Android boxes, and Netflix [Internet based services]. Similarly for radio, respondents were asked whether they have DAB+ to follow radio programmes; if yes, do they use their DAB+ radio to follow local stations only and/or to follow foreign radio stations. Interviewers were instructed that they were to clarify this question by asking whether the respondent could easily change from one station to the other without any frequency

interference; with DAB respondents never had to remember the station’s frequency; the display on the radio-set shows the station names alphabetically; and whether respondents had more stations to choose from beside local broadcasting stations.

The demographics of the population were also changed. Previously any 12 year old and above could be identified by the N.S.O. From this assessment 12 to 15 year olds were left out from the required sample and any 16 year old and above could be selected to participate.

Since children were being left out from the demographics, respondents were asked whether they had any children between 9 and 15 years and what type of programme their children liked to follow. These respondents had the option to specify three types of programmes.

As in previous audience assessments, the N.S.O. selected the sample, administered the survey and collected the data. Data was collected continuously by means of telephone interviewing conducted by National Statistics Office interviewers who were instructed to make interviews between 04:00pm – 08:00pm on weekdays and between 09:00am – 1:00pm on weekends, and were instructed to callback individuals up to 3 times before interviewing the next person in their list. This is mainly required to avoid any bias that could be introduced between the actual demographics of interviewed people and the desired sample.

For this assessment data was collected between Sunday 1st and Tuesday 31st October, both days included. A total of forty daily questionnaires were compiled giving a total sample of 1,240 respondents.

For October 2017, 35.64% of all contacted persons accepted to participate while 3.42% refused; another 22.28% of the selected sample were unreachable at the time of contact; as much as 38.46% were not contacted when the required sample was reached; while another 0.2% were ineligible as these would have been transferred to a health-care institution.

The eldest person contacted was 95 years old while the youngest were 16 year olds. Ineligible are those persons who, although selected, were not living in a household at the time of contact.

For this data-set a response rate of 35.64%, an estimated population size of 376,972 [aged 16 years and over], and a 95% confidence level, the sample of 1,240 interviewees has a margin of error of $\pm 2.66\%$.

The data collected was subsequently weighted to represent the required demographical sample by gender, by age group and by district to be representative of the whole population.

2. RADIO AUDIENCE ASSESSMENT

2.1. Radio Audience Reach

The first estimation is what is termed as **radio audience reach**. This gives the amount of people who had followed at least one radio station at any time during the day without taking into consideration the amount of time which they had spent listening to that station.

During October 2017, 54.8% stated that they had listened to radio the day before the interview while 44.9% categorically stated that they had not listened to radio the previous day. This means that as much as 207,000 persons

aged 16 or over followed at least one radio station the previous day. On the other hand 33 respondents [≈8,300; 2.2%] replied that they do not have a radio set.

Compared to previous data, there was an increase of 7.2% of radio listeners over the previous assessment period of July 2017, and more significantly there was an increase of 7.2% over the equivalent period last year (October 2016) - see below

Radio Audience Reach

On Average 207,000 persons (54.8%) aged 16 and over followed at least one radio station during October 2017

	Total N	Yes ^[1] N	No N	No Ans. N	Total %	Yes %	No %	No Ans. %

^[1]Includes those who "did not remember which station they followed" [1.4%; ≈5,200] and those who "did not follow any particular radio station" [2.6%; ≈9,900].

Respondents were given the possibility of naming up to three radio stations which they had listened to the day before. Out of a total of 1,240 respondents, 99 listeners named a second station while another 15 respondents named a third radio station. This discloses the trend that in general radio listeners tend to follow a particular radio station. All these responses were analyzed by broadcasting station and by demographics - see table below:

Bay Radio was the most followed station by all those under fifty years old – with more than half [57.48%] of 16-30 year olds and about a third of all 31-50 year olds [32.49%] following this station. ONE Radio, on the other hand, was the most followed station by all those over fifty years old – with just below a quarter [23.72%] of all 51-70 year olds and just about a third of all 70+ year olds [30.30%] following this station.

Bay Radio has attracted the largest amount of radio listeners [25.14%] with ≈57,000 listeners. This station was followed by ONE Radio with 14.84% of all listeners [≈34,000] and Vibe FM with 11.20% [≈26,000].

Bay radio was the most followed station in four of the districts while Radju Malta was the most followed station in Gozo & Comino. ONE Radio was the second most followed station in the South Harbour, North Harbour, South Eastern, and in the Northern district.

Based on Radio Listeners including those who could identify more than one station but excluding all those who could not identify a station and/or could not remember.

No viewership was registered for digital radio stations.

2.2. "DAB+"

Respondents were asked whether they have a *DAB+* radio-set to listen to radio.

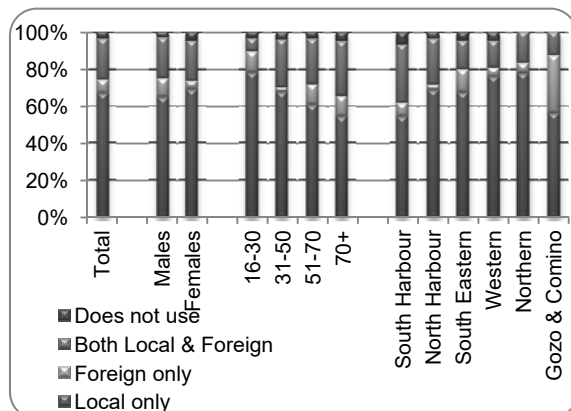

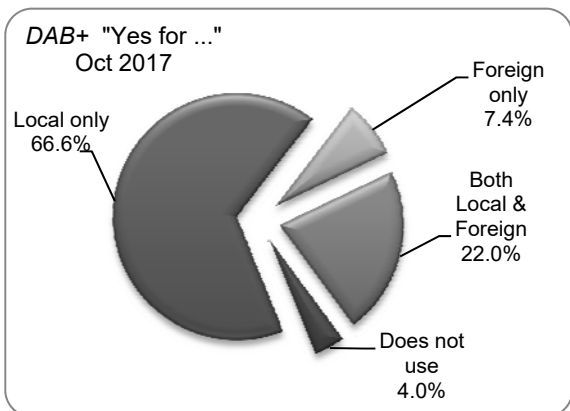

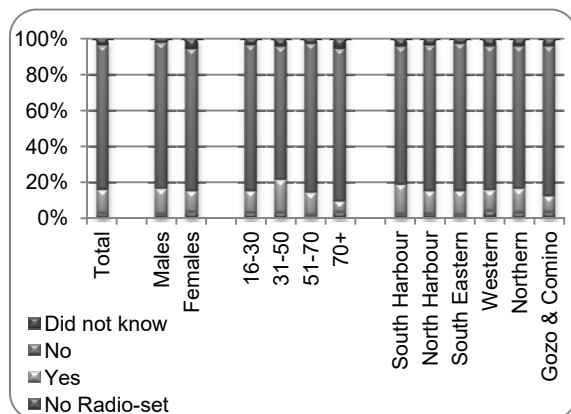

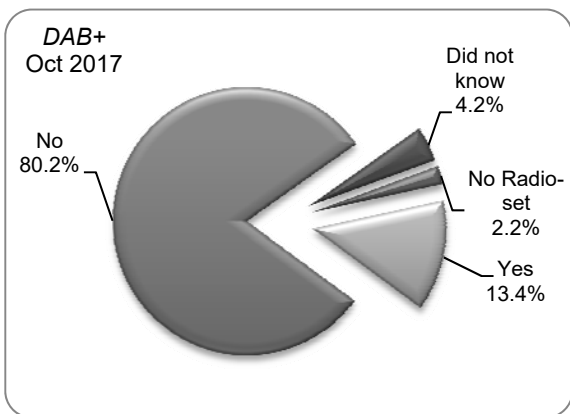

Only 4.2% of the respondents did not know what kind of radio-set they had to listen to stations. As much as 80.2% of the population replied that they do not have a *DAB+* radio-set; while only 13.4% stated that they have a *DAB+* radio-set. A further 2.2% stated that they do not listen to radio as they do not have a radio-set.

Two-Thirds [66.6%] of those who stated that they have a *DAB+* radio-set replied that they only listen to local stations; another 7.4% they use their *DAB+* radio-set to listen to only foreign stations; while 22.0% stated that they listen to both local and foreign stations broadcasting on this platform. A further 4.0% stated that although they have the availability of a *DAB+* radio-set they do not use this set.

Without taking into consideration the time spent by each radio listener, those listeners who had listened to radio and could identify the station that they were following were cross-analysed against the type of radio that they usually use to follow radio.

The highest amount of radio listeners using a *DAB+* radio-set were those of Bay Radio [≈9,400 – 16.5% of that station's reach]. These were closely followed by Radio 101 listeners [≈4,600 – 28.3%]; those following Radju Malta [≈4,500 – 18.3%]; and those of ONE Radio [≈4,300 – 12.6% of that station's reach].

The highest percentage of listeners making use of a *DAB+* radio-set were those following a foreign station [51.5%] of all those listeners; followed by those of Smash Radio were just more than a third of its listeners [34.5% – ≈2,200 listeners] follow that station on the *DAB+*.

2.3. Radio Audience Shares

Respondents were asked to indicate at what time they had listened to radio, which station they had followed, and for how long. Each participant had the possibility of naming three stations and for each station they could identify three different time periods. These replies were analyzed by half-hour slots; for each radio station; and for all the days of the week while also taking into consideration all the multiple replies received.

2.3.1. Average Audiences

The first analysis is that of calculating the average audience share of each radio station for each week-day. This is the average of all

the audiences for each particular station by half-hour slot.

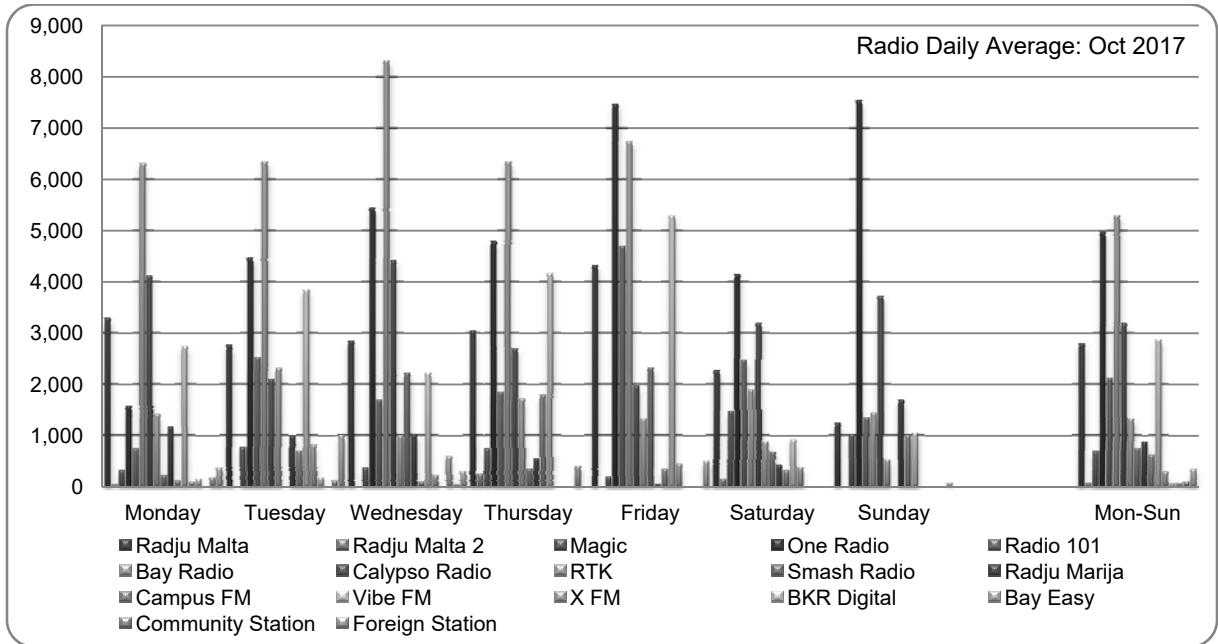

Bay Radio attained the highest total weekly average amongst all stations with 1.286% followed by ONE Radio [1.207%], Vibe FM [0.696%] and Radju Malta [0.678%]. Bay Radio had the highest average amongst all stations for Mondays to Thursdays - with that of Wednesdays (2.016%) being its highest average. ONE Radio had the highest average amongst all stations from Fridays to Sundays – with that of Sundays [1.897%] being its highest average.

2.3.2. Peak Audiences

Another indication of a radio station's popularity with its audiences is its highest amount of audiences obtained at any particular half-hour slot of each weekday.

Taking the highest peak for each station, Bay Radio had the highest peak amongst all stations on Thursdays with 7.653%; on Tuesdays [7.040%]; on Wednesdays [6.513%]; and on Mondays with 4.363%.

ONE Radio had the highest peak amongst all stations on Sundays with 6.032% and on Saturdays with 5.000%.

Vibe FM had the highest peak amongst all stations on Fridays with 6.305%.

2.3.3. Radio Audience Shares by Half-hour Slots

Audiences were **not** registered for all the half-hour slots. Before 6:00am audiences were minimal throughout the week [≈2.1%] and overall increased from 4.2% at 6:00am to 15.4% at 7:00am. Audiences peaked at 8:00am at 17.0% and again at 9:00am with 16.8% of potential listeners. This level of radio listening was maintained till 11:30am [16.3%]. Audiences rapidly decreased to 9.5% at 1:00pm

and then gradually decreasing while slightly peaking to 8.7% at 5:00pm. Audiences then gradually decreased to 1.3% at 8:00pm. Night-time radio audiences after 10:00pm were less than 1.0% of the total population.

The following figure maps the total daily audience shares for radio stations cumulative at half-hour slots:

2.3.4. Daily Average Hours of Radio Consumption

This average gives the amount of time that radio listeners spent following each radio station. This is derived from the total number of hours that radio consumers listened to, divided by the total number of listeners of each broadcasting station.

This average is susceptible to outliers especially where broadcasting stations have registered a small amount of listeners who logged on to that particular station for long time-spans [Bay Easy]. However, considering also the demo-graphical nature of radio listeners for each particular station, the average amount of time spent by listeners of each station gives an indication of radio listening patterns amongst the population.

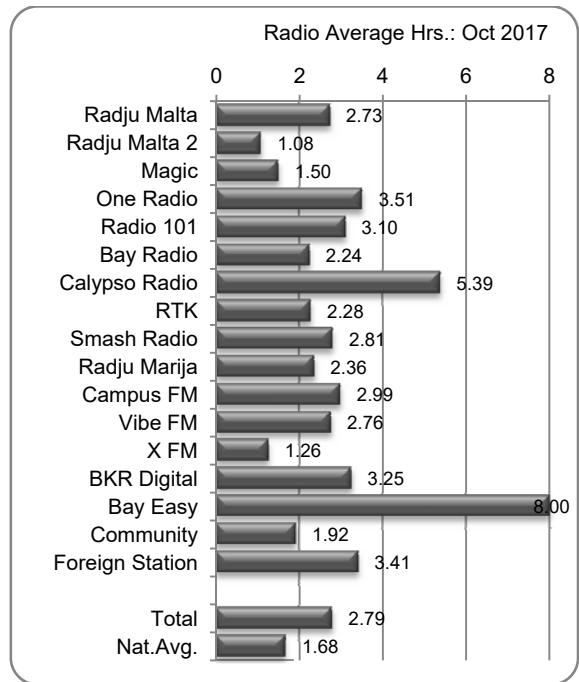

Although Bay Radio attracted the highest amount of listeners [25.14%] these listeners were mostly below 50 years old. In fact Bay Radio attracted just more than half of 16-30 year olds [57.48%] and about one-third of all 31-50 year olds [32.49%]. Their total average hours of radio listening worked out at 2.24 hrs each listener for October 2017.

On the other hand, ONE Radio attracted the second highest amount of listeners [14.84%] who, on average, have spent 3.61 hrs listening to this station. And this station attracted nearly a quarter of all 51-70 year olds [22.72%] and nearly a third of all 70+ listeners [30.30%].

The highest average of hours spent was attained by Calypso Radio which ranked 6th by radio reach of all radio stations [6.23%] at 5.39 hrs per radio listener.

The average amount of hours over all radio listeners results to 2.91 hrs per listener and

over the whole of the population aged 16 years and over, amounts to 1.41 hrs.

Compared to previous assessments, the amount of hours spent listening to radio has decreased by 7.2 minutes over the previous assessment of July this year [from 2.91 hrs to 2.79 hrs] and by 10.7 minutes over that of the previous period last year [Oct 2016; 2.97 hrs].

On a national average, the number of hours spent listening to radio stations [1.68 hrs] has increased over that of the previous period [July 2017; 1.41 hrs] and over the same period last year [Oct 2016; 1.36 hrs].

2.3.5. Radio Stations Audience Share

Taking all the audiences (i.e. the number of listeners and the amount of time spent) for all the weekdays, the daily average radio audience share attained by each broadcasting station is shown in the figure below.

Overall, Bay Radio ranked first with 20.11% of all audiences, followed by ONE Radio [18.87%]; Calypso Radio [12.05%]; Radju Malta [10.59%]; Vibe FM [10.88%]; Radio 101 [8.05%]; and RTK [5.01%].

3. TV AUDIENCE ASSESSMENT

3.1. TV Audience Reach

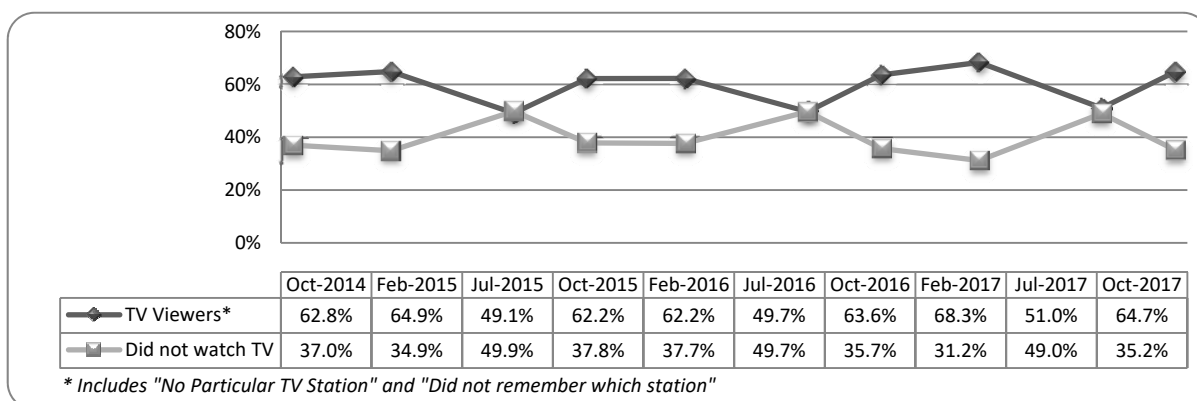

Similar to radio assessment, the first estimation is the amount of people who had followed at least one TV station at any time during the day without taking into consideration the amount of time which they had spent following that particular station.

During October, 64.7% of respondents stated that they had watched television the day before the interview. This was 13.7% higher than that registered during the previous assessment of July 2017 [51.0%] and was 1.1% higher than

that registered for the same period last year [Oct 2016: 63.6%]. During this period a total of 244,000 persons aged 16 or over, followed at least one TV station – see below.

Respondents were given the possibility of naming up to three TV stations which they had watched the day before the interview. Out of a total of 1,240 respondents, 398 viewers named a second station while another 133 respondents named a third TV station. All these responses were analyzed by broadcasting station and by demographics – see table below.

TV Audience Reach

On average 244,000 persons (64.7%) aged 16 or over followed at least one TV station during October 2017

Based on TV Viewers including those who could identify at least one station but excluding all those who could not identify a station and/or could not remember.

TVM has attracted the largest amount of TV-viewers [37.99%] with approximately 143,000 viewers. This station was followed by ONE with 16.81% and Net TV with 9.35% - excluding those following a foreign station.

Overall, while 67.3% of the viewers followed local stations, only just less than a third of the population [32.70%] watched a foreign station. Of the local stations, only TVM, ONE, and Net

TV had audiences from all the demographical groups.

By demographics the same trend in ranking follows. However it is evident that the viewing of local stations is higher with those over the age of 50 years while the viewing of foreign stations is higher with those from 16 to 50 years old.

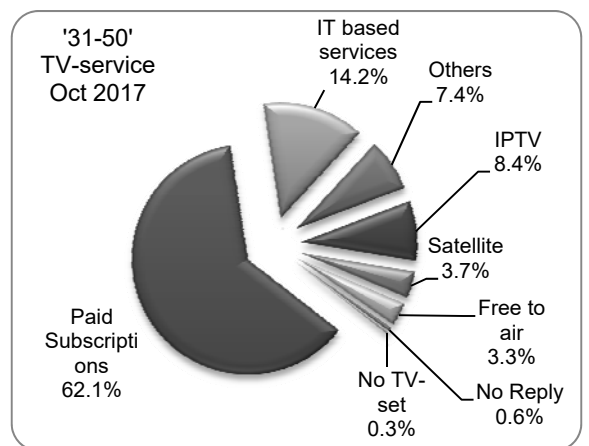

3.2. TV Services

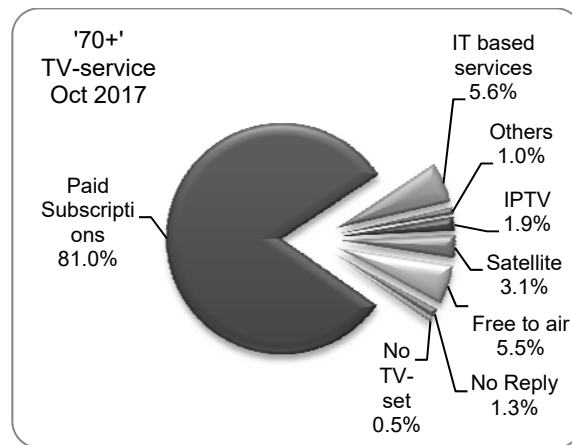

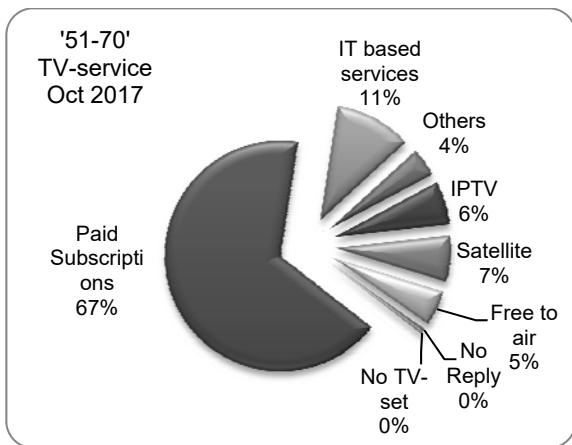

Respondents were asked what type of service they have to watch television. Six options were read out by interviewers.

Taking into consideration the total of all the replies, the most common service for watching television is that of a paid subscription [64.6%]; followed by Internet based services [12.1%]; IPTV streaming [6.5%]; and Satellite [4.6%]. Another 7.0% of the population follow television programmes through laptop, mobile, or tablet streaming (“Others”); a further 0.5% do not have a TV-set; while 0.8% did not reply.

Only 3.3% of the population follows television on the Free-to-air platform. Of this group, 52.3% [≈10,900] have an only Free-to-air connection while the rest [47.7%; ≈9,900] makes use of one or more of the services available.

More types of television services are used by those of the 31-50 age group while the lowest was that amongst the 70+ age group. While just half of the 16-30 age group [56.3%] make use of paid subscriptions, as much as 81.0% of the 70+ age group depend on this type of service.

Based on Total Replies

3.3. TV Programme Genres

Respondents were asked what type of programme they like to watch on local television. A list of eleven categories were read out by the interviewer and respondents declared their preference to that category or not.

Local & Foreign News were the most favorite programme genre [26.3%]. Local Drama programmes ranked second [15.6%] while Discussion & Current Affairs programmes ranked third [13.0%]. Cultural/Educational ranked fourth [8.7%] and these were closely followed by Documentaries [7.8%].

Each of the other categories named by interviewers were as follows:

Sports	– 7.3%
Light Entertainment/Comedy/Games	– 6.4%
Religious	– 5.3%
Music Videos	– 4.1%
Teleshopping	– 3.3%
Children's	– 2.3%

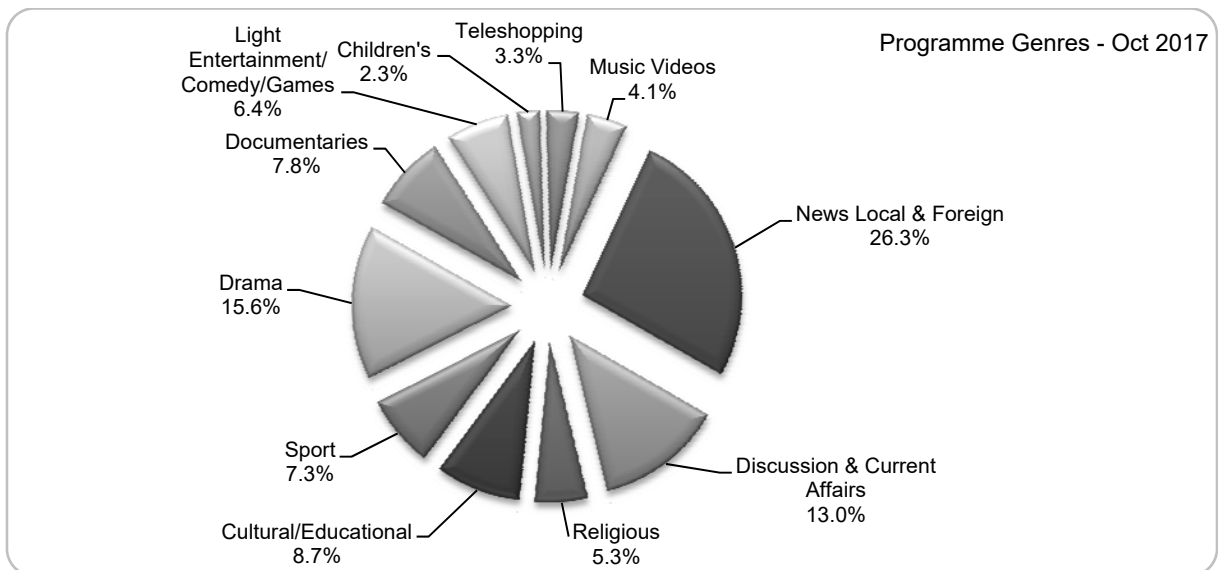

When analysed by gender, male preferences exceeded those of females in two categories [Sports (+10.5%) and Documentaries (+3.0%)];

female preferences exceed those of males in Drama (+7.4%); Light Entertainment (+2.9%); Religious programmes (+3.0%), and Teleshopping [+2.2%].

There was very little gender difference for News Local & Foreign (+2.0%); Discussion programmes (+1.7%); Music Videos (+0.2%); Children's programmes (+0.9%); and Cultural/Educational programmes (+0.9%).

Analysed by age-groups, the highest three programme genres still had the same ranking throughout for all the age groups.

Overall, programme genre preferences increase with age. The highest noticeable increase was that of Religious programmes which increased from 2.0% of all 16-30 year olds to 8.2% of all 70+ year olds; while the most noticeable decrease was that of Music Videos which decreased from 6.8% for 16-30 year olds to 2.7% for all 70+ year olds.

3.4. TV AUDIENCE SHARES

Respondents were asked to indicate at what time they had watched television and for how long. These replies were analyzed by half-hour slot, for each TV station, and for all the days of the week while also taking into consideration all the multiple replies received.

3.4.1. Average Audiences

The first analysis is that of calculating the average audience share of each TV station for each week-day. This is the average of all the audiences for each particular station by half-hour slot.

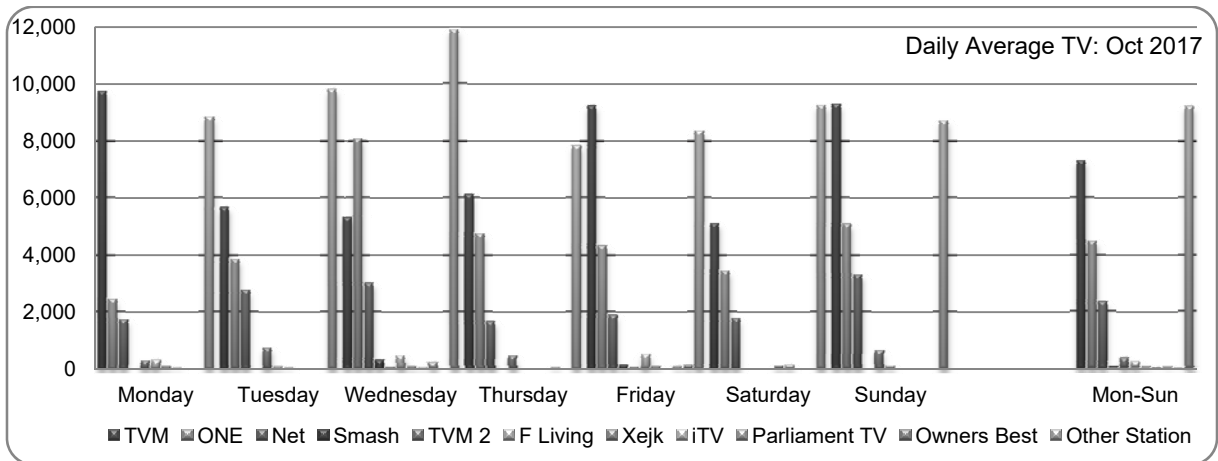

Excluding foreign stations, TVM had the highest average amongst all stations for all the weekdays from Monday to Sundays [1.405%] while ONE attained the second highest daily average among all stations with 0.858%.

TVM had its highest average amongst all stations on Mondays [1.918%], Fridays [1.811%], and Sundays [1.757%]; with its highest being that on Mondays.

ONE had the highest daily average on Wednesdays [1.401%] while Net TV had its highest average on Sundays [0.624%].

3.4.2. Peak Audiences by Station

Another indication of a TV station's popularity with its audiences is its highest amount of audiences obtained at any particular half-hour slot of each weekday.

TVM had the highest peaks amongst all stations for all the weekdays from Monday to Sunday. The highest peaks attained by TVM were in this ranking order: Mondays [24.051%]; Thursdays [21.588%]; Tuesdays [20.826%]; Wednesdays [18.906%]; Fridays [14.712%]; Saturdays [14.670%]; and Sundays [13.498%].

Of the local stations the next highest peak attained was that by ONE on Tuesdays with 10.823% followed with that of Net TV again on Tuesdays [5.254%].

3.4.3. TV Audience Shares by Half-Hour Slots

Audiences were not registered for all the half-hour slots. Audiences throughout the day started picking up slowly at 8:30am with 0.901% rising gradually to 3.016% by noon; peaking up to 4.356% at 2:00pm and re-peaking to 7.581% at 6:00pm. Audiences rose sharply from those at 7:30pm [18.755%] to 27.828% at 8:00pm where the average highest

audiences were reached. Audiences were maintained and peaked to 20.342% by 9:00pm; falling to 13.866% at 10:00pm; and further to 1.343% at midnight.

The following figure maps in detail the total daily audience shares for TV stations cumulative at half-hour slots:

3.4.4. Daily Average Hours of TV consumption

This average gives the amount of time that each viewer has spent following each TV station. This is derived from the total number of hours that consumers watched television divided by the total number of viewers of each broadcasting station.

This average is susceptible to outliers especially where broadcasting stations have registered a small amount of viewers who logged on to that particular station for long time. However, considering also the demographical nature of TV viewers for each particular station, the average amount of time spent by viewers of each station gives an indication of viewing patterns amongst the population.

While TVM attracted the highest percent of viewers [37.99%] followed by ONE which attracted the next percent [16.81%], the time spent on average by ONE viewers [1.72 hrs] is 39% higher than those of TVM [1.24hrs].

The average amount of hours over all TV viewers amounts to 1.55hrs per viewer and over the whole of the population aged 16 years and over, these amounts to 1.11hrs.

3.4.5. TV Stations Audience Share

Taking all the audiences for all the weekdays, the daily average TV's audience share attained by each broadcasting station is shown in the figure below.

Overall, TVM ranked first with 30.3%; followed by ONE with 18.5%, and Net TV with 9.7%.

4. CHILDREN WATCHING TV

At the end of the telephone questionnaire respondents were asked whether they have children between 9 and 15 years old, and if in the affirmative, respondents were then asked what type of programme their children liked to watch on television.

4.1. Children 9-15 years old

Out of all the respondents 7.8% replied that they have children between 9 and 15 years old [≈29,000] who regularly watch television. On the other hand another 2.4% [≈9,000] stated that although they have 9-15 year olds their children do not watch television.

Does not watch TV				
	Total N	16-30	31-50	51-70
Males	3,424		3,141	283
Females	5,756		5,564	191
[N]	9,180		8,705	474
[Row %]	100		94.8	5.2
	Total %	16-30	31-50	51-70
Males	37.3		36.1	59.7
Females	62.7		63.9	40.3
	100		100	100

The highest percent [30.3%] of respondents who have said that they have 9-15 year olds are from the 31-50 age group. Only 1.0% of all 16-30 year olds replied that they have such children; while another 1.4% of all 51-70 year olds have so.

As much as 2.4% [≈9,200] of all respondents categorically replied that their children between the age of 9-15 years do not watch television. As much as 94.8% of these are from the 31-50 age group [≈8,700]; another 5.16% are from the 51-70 age group [≈500]; while none from the 16-30 age group stated that their children do not watch TV.

4.2. Programmes followed by 9-15 year olds

The responses were grouped into twelve difference categories and analysed by the age groups of respondents as follows:

The most quoted were Children's programmes [59.22%]; followed by Entertainment [12.44%] and Cultural/Educational programmes [9.18%].

Children whose parents are from the 16-30 age group are reported to a children's channel. Children whose parents are from the 51-70 age

group are reported to follow most Children's programmes [58.58%]; Entertainment [13.34%]; Cultural/Educational [9.13%] and TV series [6.54%].

Nearly half of the children of all those between 51-70 years old [43.9%] have stated that their children follow a children's channel; 20.85% follow Music programmes on TV; while the rest follow either a cultural/educational programme [17.62%] or an on-demand channel [17.62%].

Le [No]	(2)
Ma Nafx	(3)
M'ghandix sett tar-Radju	(4)
Minghajr risposta..	(5)

Jekk ghandek id-DAB, dan biex tisma' kontenut lokali jew kontenut ta' Barra.

The signal will either be brilliantly crisp and clear or it won't be there at all.

Meta taqleb minn stazzjon għall ieħor l-istazzjon ikun car mill-ewwel jew ikollok xi interferenzi?

With DAB, you never need to remember a station's frequency. The display on the radio shows the station names alphabetically.

Bid-DAB+ aktar faċli li taqleb minn stazzjon għall ieħor ghax juri l-istem ta' kull stazzjon u ghandek aktar stazzjonijiet ixandru fuqu.

Issa se nistaqsik xi ftit mistoqsijiet dwarek innifsek:

6. Inti raġel jew mara?

R (1)	M (2)
-------	-------
7. Kemm għandek eta? _____
8. F' liema lokalita toqgħod? _____

Għandek tfal bejn id-9 u l-15 il-sena?

	Code

APPENDIX D: TV AUDIENCES BY HALF-HOUR SLOT – MONDAY TO SUNDAY

A “nil” record only means that audiences were less than 2000; and not that there were zero audiences.
