Most followed TV station

Respondents were given the possibility of naming up to three TV stations which they had followed the day before the interview. Out of a total of 1,240 respondents, 422 respondents named a second station while another 140 people named a third television station which they had followed.

Out of the population following local stations, TVM has attracted the largest amount of TV-viewers [33.35%] with approximately 143,000 viewers. This station was followed by ONE with 18.41% and NET TV with 7.88%.

Overall, while 68.43% of all viewers followed local stations, less than a third of the population [32.16%] watched a foreign station. Of the local stations, only TVM, ONE, and NET TV had audiences from all the demographical groups.

By demographics the same trend in ranking follows. However it is evident that the viewing of local stations is the highest with those over the age of 50 years; while the viewing of foreign stations is higher with those from 12 to 50 years old.

Excluding foreign stations, TVM, ONE and Net TV ranked first, second and third respectively by gender, in all the age groups, and by districts. NET TV ranked third by gender, by district, and for all those over 20 years old. The third preference of 12-20 year olds was for TSN Melita/GO [4.40%], followed by TVM2 [2.73%]

By age groups, TVM had its highest percentage of audiences by gender, amongst all the age groups, and by districts.

The viewing of a foreign television station was highest amongst 31-50 year olds [40.42%] while the lowest was that amongst the 71+ year olds [26.42%].

TV stations' audiences

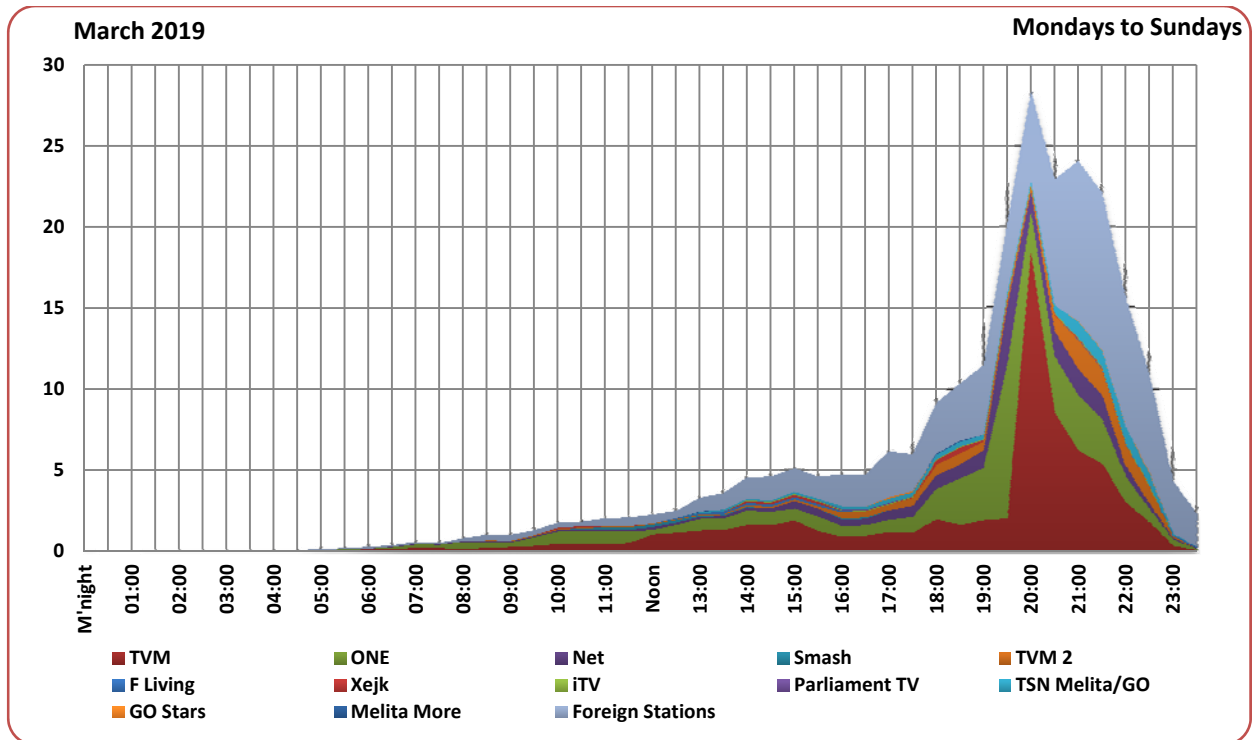

TV respondents were asked to indicate which television station they had followed the day before the interview and for how long. Each participant could name up to three stations and indicate three different time-periods for each station during which they had followed that particular station.

The focus of this section is not only on how many viewers each station could attract, but also for how long each station was followed by each viewer. Thus, the basis of this section are the audiences for each station multiplied by the number of half-hour slots during which each viewer was following that particular station.

TV Audience Shares by Half-Hour Slots

Audiences were not registered for all the half-hour slots. Audiences throughout the day started picking up slowly at 8:00am with 0.788% rising gradually to 2.449% by noon. Audiences then peaked up to 5.097% at 3:00pm and rose to 9.148% at 6:00pm. Audiences rose sharply from those at 7:00pm [11.463%] to 28.363% at 8:00pm where the average highest audiences were reached. Audiences were generally maintained but peaked to 24.058% by 9:00pm; falling to 15.641% at 10:00pm; and further to 4.350% at 11:00pm. Night-time viewing was minimal.

The following figure maps in detail the total daily audience shares for TV stations cumulative by half-hour slots:

Average Audiences

The first analysis is that of calculating the average audience share of each TV station for each week-day. This is the average of all the audiences for each particular station by half-hour slot.

Taking the total average over a whole week [Monday to Sunday and excluding foreign stations], TVM attracted the largest average amount of viewers [1.446%] followed by ONE [0.961%] and Net TV [0.379%]. The highest overall percentage average viewers [Monday to Sunday] were attained by Foreign Stations with the highest total weekly average of 1.856% while the highest daily average of viewing of a foreign station was that of Wednesdays with 2.273%.

Excluding foreign stations, TVM had its highest average amongst all local stations for all the weekdays except for Wednesdays. Its highest average was that on Fridays [1.889%] followed by that of Sundays [1.806%]; Tuesdays [1.659%]; Saturdays [1.354%]; Thursdays [1.114%]; and Mondays [1.039%].

ONE had the highest average amongst all local stations on Wednesdays [1.328%] which was also its highest for all the weekdays.

The highest average of Net TV was also on Wednesdays [0.661%].

Daily Average Hours of TV consumption

This average gives the amount of time that each viewer has spent following each TV station. This is derived from the total number of hours that consumers watched television divided by the total number of viewers of each broadcasting station.

This average is susceptible to outliers especially where broadcasting stations have registered a small amount of viewers who logged on to that particular station for a long time – a case in point being that of one viewer who watched only a particular station throughout the day resulting on an average of 9 hrs for that station. However this average gives an indication of viewing patterns amongst the population.

Of the local stations, while TVM attracted the highest number of viewers [33.35%] followed by ONE [18.41%], the time spent on average by both TVM and ONE viewers was at 1.46hrs and 1.76hrs respectively. Those following a foreign station spent an average of 1.95hrs.

On average the stations which managed to maintain their audiences for the longest time were TSN Melita/Go [2.44hrs] and F Living [2.44hrs].

Amount of Radio listeners

Respondents were asked which radio station/s they had listened to the day before the interview. Irrespective of the amount of time which each respondent had spent listening to any particular radio station as well as irrespective of the number of radio stations they had followed the day before the interview, 242,500 persons (aged 12 years and over) listen to radio regularly. This is just above half the population – 56.0%.

Compared to previous data, there was an increase of 1.0% of radio listeners over the previous assessment period of October 2018 and an increase of 5.1% over that of a similar period last year (February 2018).

Radio stations followed

Respondents were asked to indicate which station they had followed and for how long. Each participant could name up to three stations and indicate three different time-periods for each station during which they had followed that particular station.

The focus of this section is not only on how many listeners each station could attract, but also for how long each station was able to maintain their audiences. Thus, the basis of the analysis are the audiences for each station multiplied by the number of half-hour slots during which they were following that particular station.

Radio Audience Shares by Half-hour Slots

Audiences were registered for all the half-hour slots. Before 6:00am audiences were minimal with an average of 0.59% per half hour slot.

Audiences increased from 4.77% at 6:00am to 13.81% at 7:00am; peaking again at 8:00am at 17.21% and again at 9:00am with 18.08% of potential listeners. This level of radio listening was maintained till 11:30am [17.20%]. Audiences rapidly decreased to 8.92% at 1:00pm and gradually decreasing after 1:00pm while slightly peaking to 9.42% at 2:00pm. Audiences then peaked again at 4:00pm [9.49%] and gradually decreased to 2.37% at 8:00pm. Night-time radio audiences after 10:30pm were less than 2.0% of the total population.

The following figure maps the total daily audience shares for radio stations cumulative at half-hour slots:

Average Audiences

Daily Average Hours of Radio Consumption

This average gives the amount of time that radio listeners spent following each radio station. This is derived from the total number of hours that radio consumers listened to, divided by the total number of listeners of each broadcasting station.

This average is susceptible to outliers especially where broadcasting stations have registered a small amount of listeners who logged on to that particular station for long time-spans. However, considering also the demographical nature of radio listeners for each particular station, the average amount of time spent by listeners of each station gives an indication of radio listening patterns amongst the population.

89.7 Bay attracted the highest amount of listeners [23.83%]; more than a quarter of all female radio listeners [29.55%] and the highest percent of male listeners [17.45%]. However the listeners of 89.7 Bay were mostly below 50 years old. In fact 89.7 Bay attracted 68.5% of all the 12-20 year olds; 45.8% of all 21-30 year olds, and just less than a third [30.85%] of all 31-50 year olds. Their total average hours of radio listening worked out at 1.71hrs per listener.

On the other hand, ONE Radio attracted the second highest amount of listeners [15.811%] who, on average, have spent 4.76hrs listening to this station. This station attracted 16.5% of all males; 15.2% of all females; 25.4% of all 51-70 year olds; and 31.2% of all 70+ listeners [26.40%].

The radio listeners who have spent most time listening to their favourite radio station were those of Calypso Radio who overall have spend an average of 4.49hrs each.

The average amount of hours over all radio listeners results at 3.02hrs per listener and over the whole population aged 12 years and over, this amounts to 1.62hrs.

Compared to previous assessments, the amount of hours spent listening to radio has increased by 12'36" over the previous assessment of October 2018 [from 2.81hrs to 3.02hrs] and has increased by 1'48" over

that of a similar period last year from 2.99hrs [Feb 2018] to 3.02hrs..

On a national average, the number of hours spent listening to radio stations [1.62hrs] has increased by 6'36" over that of the previous assessment period [Oct 2018; 1.51hrs] and has also increased by 3minutes over a similar period last year [Feb 2018: 1.67hrs].

Radio Stations Audience Share

Taking all the audiences (i.e. the number of listeners and the amount of time spent) for all the weekdays, the daily average radio audience share attained by each broadcasting station is shown in the figure below.

Overall, ONE Radio ranked first with 24.9% of all audiences, followed by 89.7 Bay [13.4%]; Calypso Radio [13.0%]; Radju Malta [9.8%]; Vibe FM [8.1%]; Radju Marija [7.4%]; NET FM [7.0%]; Magic Malta [4.6%]; RTK [4.3%]; Smash Radio [2.7%]; while the rest had less than 1% of the audiences.

This shows the percentage of air-time that listeners followed each particular radio station.

Radio programmes followed

Starting from this year, respondents were also asked which radio programme they normally follow. Unlike television where audiences follow programmes, radio listening is time-based; very few listeners switch on at the beginning of a programme, and off at the end of it.

Listeners' habits are more fixed early in the day – they tend to listen to the same station at about the same time every day. Habits are less rigid in the middle of the day, and least rigid late at night.

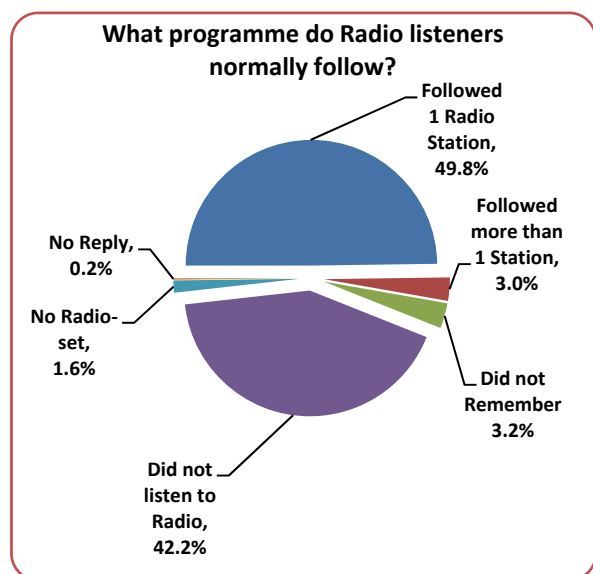

There are three main ways of increasing audiences – increasing reach; increasing the duration of listening; and targeting new audiences. However, audiences are easy to lose; and hard to gain when programs are drastically changed. Knowing what radio programmes are normally followed by listeners has become a must as stations require variation in programming – but not too much to confuse the regular listeners.

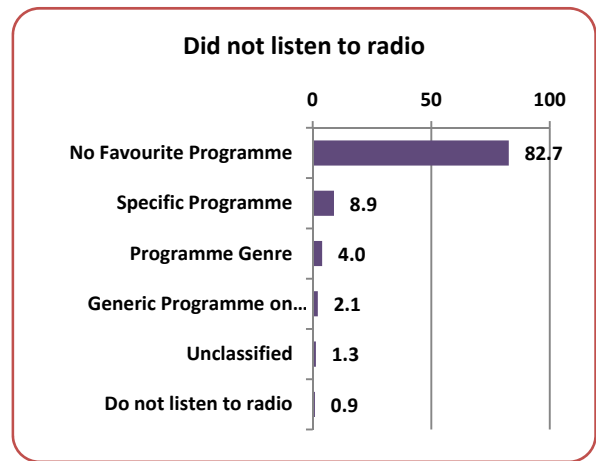

This was an open-ended question and the responses were first grouped into the following categories of whether the respondent:

- Named a specific programme;
- Named a generic programme on a specific station;
- Named a programme genre;
- Does not have any favourite programme;
- Does not know; and
- Categorically does not listen to radio.

The respondents were then categorised whether they had:

- Listened to at least one radio station;
- Listened to more than one station;
- Did not remember which radio station they had followed;
- Did not listen to radio;
- Do not have a Radio-set; and
- Did not reply.

In earlier calculations in this report it was stated that as much as 56.0% of the population have listened to radio: 49.8% listened to one station; 3% listened to more than one station; and another 3.2% did not remember which station they had followed.

More than half of radio listeners [56.49%] could name a specific programme which they normally follow [34.16%]; have named a programme genre [15.43%]; have named a generic programme on a specific station ["Music on Z Station": 6.25%]; while a further 0.65% named programmes that could not be classified.

Just more than half [50.67%] of those who had listened to more than one station, 31.31% could name a specific programme; 12.44% named a programme genre; and 6.92% named a generic programme on a specific station.

Of interest are those who stated that they could not remember which station they had followed. Of these, 9.87% named a specific programme, 6.02% named a programme genre; while another 4.33% named a generic programme on a specific station.

Similarly the responses of those who did not listen to radio the day before the interview which amounted to 42.2% of the population. Although 82.7% of these did not have a favourite programme, as much as 8.9% could either name a specific programme; mentioned a programme genre [4.0%]; named a generic programme on a specific station [2.1%]; while another 1.3% named programmes that could not be classified.

Analysis of responses

We can classify radio programmes under two general headings: spoken word and music. However, considering that radio broadcasts can be split into five segments of any broadcast day we have chosen to classify the responses under five main time-brackets:

- a) The Morning Drive 06:00am - 10:00am
 - Breakfast/Morning Shows; News & Weather reports; and Sportscast.
- b) Daytime 10.00am - 3.00pm
 - Call-in/Request shows; Talk Shows; Radio Drama
- c) Afternoon Drive 3.00pm - 7.00pm
 - Factual; Entertainment & Comedy
- d) Evening 7.00pm - 12.00am
 - Music Chart Show; Live Music
- e) Overnight 12.00am - 6.00am
 - Religion & Ethics; Music Show

The amount of responses for each bracket practically coincide with the radio audiences by half-hour slot figure depicted earlier. Morning Drive programmes named account for 36.2% of all responses; Daytime programmes account for 23.4%; Afternoon Drive programmes – 5.5%; Evening programmes – 1.1%; and Overnight programmes 5.1%

There were noticeable differences between gender. Males exceeded females [4.19%] for morning drive programmes; females exceeded males [5.77%] for daytime programmes; males exceeded females [3.05%] for the afternoon drive; and females exceeded males [4.05%] for overnight programmes. The difference for generic programmes was minimal – by 1.82% [Males: 29.61; Females: 27.79%].

When analysed by age groups, morning drive programmes were quoted most by 21-30 year olds [58.89%] and by 31-50 year olds [58.35%]; and quoted the least by the 51-70 year olds [21.22%] and 70+ year olds [13.12%].

On the other hand, Daytime programmes were quoted most by 71+ year olds [42.27%] followed by 51-70 year olds [34.03%]. These were quoted the least by 21-30 year olds [3.77%] and by 12-20 year olds [4.98%].

Overnight programmes were quoted only by 31-50 year olds [0.7%] and by 71+ year olds [4.27%].

Analysed by district only 5.53% of the validated responses were from Gozo & Comino. The highest

What programme do Radio listeners follow - By Time Brackets?

rate were those from the North Harbour District [29.03%] followed by those from the Southern Harbour area [24.40%]

Generic Programmes

As much as 28.6% of the responses named a programme genre; sometimes even quoting on which station they prefer to listen that kind of programme. More than a third of these responses named Music programmes [35.15%] while another 15.26% named a specific station on which they prefer to hear music. The next highest named were Breakfast Shows [12.10%].

As much as 9.3% of the responses of this group replied that they like to listed All the programmes broadcast; while another 10.18% replied that they like to follow all the programmes of a specific station.

More details on these categories can be found at the end of this report.

Only 7.3% of respondents stated that they never listen to radio while 16.9% stated that they are not regular radio listeners.

DAB+ Radio ownership

Respondents were asked whether they have a *DAB+* radio-set to listen to radio; and, if they do have a *Dab+* radio-set, what type of content do they listen to – local content only; foreign content only; and both local as well as foreign content.

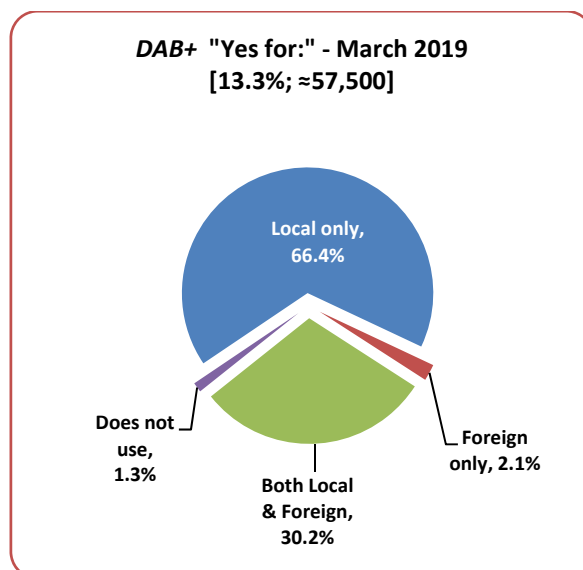

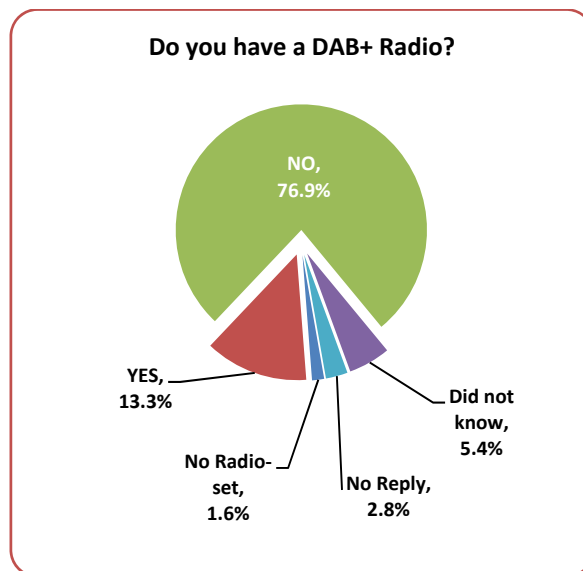

5.4% of the respondents did not know what kind of radio-set they use to listen to radio stations. As much as 76.9% of the population replied that they do not have a *DAB+* radio-set; while only 13.3% stated that they have a *DAB+* radio-set. A further 1.6% stated that they do not have a radio-set.

Of all those who stated that they had a *DAB+* radio-set the highest amount was amongst the 31-50 year olds [≈22,500; 15.9% of all 31-50 year olds] followed by those in the 51-70 age group [≈12,800; 31.4% of all 21-30 year olds].

Beside this, the highest amount who did not know whether they had or not a *DAB+* radio-set was also amongst 31-50 year olds [≈7,700; 5.4% of all 31-50 year olds] followed by 12-20 year olds [≈6,800; 10.4% of all 12-20 year olds].

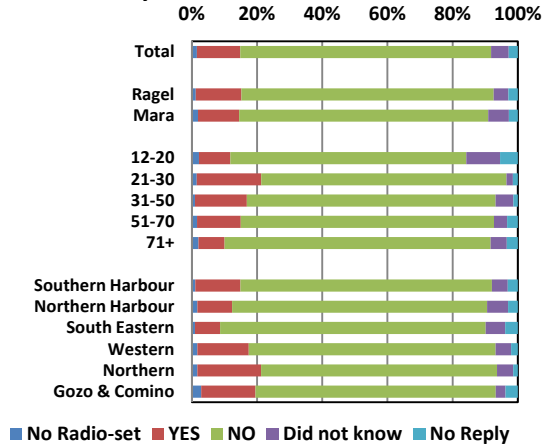

Those who stated that they had a *DAB+* radio-set [≈57,500; 13.3% of the population] were then asked what type of content they listen to. 66.4% [≈38,200] of these stated that they listen to “local stations only” while 2.1% [≈1,200] stated that they listen to “only foreign radio stations”. Another 30.2% [≈17,400] stated that they listen to both local and foreign stations while another 1.3% [≈700] stated that although they have a *DAB+* radio-set they do not use this set.

Compared to the previous assessment of October 2018, there was a minimal increase [≈160] in the number of respondents who said that they had a *DAB+* radio-set. The largest increase was within that group who stated that they use their *DAB+* radio-set to listen to “both local and foreign” broadcasts [≈4,700] while the largest decrease was amongst those who stated that they listen to “local stations only” [≈(1,600)].

Technical Report

It is important to note that during 2018, NSO undertook a revision of its population data, however 2017 and preceding years have not been re-weighted to reflect changes in the population levels. The figures for 2018 and 2019 are in line with NSO revisions.

For this year some changes were made. Data collection will be carried out during the following periods:

- 2 March to 1 April 2019 (31 days);
- 2 July to 1 August 2019 (31 days); and
- 2 November to 2 December 2019 (31 days).

Another new question was asked regarding radio listening. Respondents were also asked “What programme do you normally follow”. This is an open-ended question and the expected replies were either that of naming a specific programme or naming a programme genre. The raison d'être is not that of a beauty contest amongst programmes/ broadcasters but only as a programming aid for variation in radio content.

As in previous assessments, the N.S.O. selected the sample, administered the survey and collected the data. Data was collected continuously by means of telephone interviews between 04:00pm and 08:00pm on weekdays and between 09:00am and 1:00pm on weekends and instructed interviewers to callback individuals up to 3 times before interviewing the next

person in their list to reduce any bias that could be introduced between the actual demographics of the people interviewed and the desired sample.

For this assessment data was collected for Friday, 1st and Sunday 31st March 2019, both days included. A total for forty daily questionnaires were compiled, giving a total sample of 1,240 respondents.

For March 2019, 29.5% of all contacted persons accepted to participate while 3.3% refused. The eldest person contacted was 96 years old while the youngest were 12 year olds.

For this data-set a response rate of 29.5%, an estimated population size of 432,844 [aged 12 years and over], and a 95% confidence level, the sample of 1,240 interviewees has a margin of error of $\pm 2.53\%$.
